

**PROJECT INFORMATION**

**Project Name:**  
**Airport Pump Station Improvements**

**Strategic Priority:**  
 Infrastructure / Water Transmission

**Council District(s):**  
 5

**Type of Project:** Water    **Department:** Utilities

**Project Description**

The Airport Pump Station supplies water to the elevated storage tank at China Spring Rd. and Hwy 185. The current pumping capacity is no longer sufficient to meet water demand for this growing area. This project will add additional pumping capacity necessary to meet future demand.

**Project History**

The pumping capacity is sufficient to meet the projected water demand of 1980. Since that time, the area has experienced rapid growth and projected demand necessitates an increase in pumping capacity.

**Community Benefit**

This project will add additional pumping capacity necessary to meet demand well into the future, ensuring adequate water supply.

**Estimated Project Cost**

**\$2,500,000**

**Estimated Duration:** 12 months

**Project Status:** pre-construction

**Project Info Updated:** 01/5/2017
