

PROJECT INFORMATION

Project Name:
Riverside Transmission Water Line

Strategic Priority:
 Infrastructure / Water Transmission

Council District(s):
 1

Type of Project: Water **Department:** Utilities

Project Description

This project provides a new 30-inch water line in Pressure Plane 1, connecting Riverside Water Treatment (WTP) to the Gholson Pump Station (PS) and Ground Storage Tank (GST).

Project History

System analysis indicates that the city has difficulty supplying water to the northern portion of the water system and maintaining tank levels at the Gholson GST and TSTC Elevated Storage Tank (EST). The proposed 30-inch water line will provide a direct feed from the Riverside WTP to the Gholson PS & GST, increasing supply to the northern portion of Waco and northern McLennan County.

Community Benefit

This project will ensure the continuation of safe and reliable water service well into the future. It increases the amount of water than can be moved through the system to customers in north Waco.

Estimated Project Cost

\$10,800,000

Estimated Duration: 12 months

Project Status: design

Project Info Updated: 01/05/17
